

Blacklight phase in / phase out ANS

The Blacklight phase in / phase out solution supports the start-up and run-out process of materials from the sales point of view. It enables customer requirements to be distributed to the correct SD scheduling agreements and items according to configurable criteria.

Highlights

- Central Dashboard
- Configurable selection options and display
- User-specific work lists
- Simulation of the start-up / run-out situation
- Discontinuation control possible across scheduling agreements
- Configuration at material, Sold-to, Ship-to or scheduling agreement level
- Scenarios: phase in / phase out by date, cml. qty. and residual quantity control
- Supported processes: Standard scheduling agreement with delivery schedules, External Agent and JIT
- Monitoring of faulty starting / stopping positions
- Semi-automatic processing via ANS Monitor or fully automatic during IDoc-processing
- Jumps to sales documents, master data, etc.
- Change log
- Flexible expansion options

Advantages

Short implementation
